Non Genuine Turbochargers, the Technical Truth.

Do you need a Turbocharger?

Before you consider anything check out the recent analysis explaining the differences between a non genuine turbocharger and a Cummins genuine turbocharger. Both turbochargers were disassembled and checked visually, dimensionally, and specifically for inherent defects in the castings.

Tests were performed using various standard Cummins Turbo Technologies production techniques for quality. The non genuine turbocharger was outside of Cummins Turbo Technologies current standards for almost all critical areas including:

- Production machining quality
- Dimensional accuracy
- Level of casting defects
- Shaft balance

For the complete details on the analysis performed see your local Cummins branch or participating dealer for bulletin number 2878815.

Why risk your engines performance with a non genuine product. Choose Cummins Genuine. Contact your local Cummins branch or authorised dealer for a competitive price on a Genuine Cummins ReCon turbocharger today.
